

$$1.) \frac{1}{4} \div 2 = \frac{1}{4} \div \frac{2}{1} = \frac{1}{8}$$

Flip and times it! (flip second fraction the multiply)

$$\frac{1}{4} \otimes \left(\frac{1}{2}\right) = \frac{1 \times 1}{4 \times 2} = \frac{1}{8}$$

$$2.) \frac{2}{3} \div 2 =$$

$$5.) \frac{3}{5} \div 5 =$$

$$3.) \frac{1}{5} \div 4 =$$

$$6.) \frac{2}{5} \div 3 =$$

$$4.) \frac{2}{9} \div 3 =$$

$$7.) \frac{4}{5} \div 11 =$$
