

Make these amounts in 2 or 3 ways. Draw the coins for each amount.

|            |            |
|------------|------------|
| 49p        | 55p        |
| 64p        | 84p        |
| £1 and 25p | £5 and 33p |

For each amount think about...

What is the LEAST amount of coins that you could use?

Can you make that amount using only silver coins?

Can you make that amount using only round coins?
